Modular Din Rail Product

CHINT•Empower the World

Founded in 1984, CHINT Group is a leader in Chinese industrial electric appliance and new energy sectors. With total assets of 36.5 billion RMB and nearly 30 thousand employees, the company is running business that covers the whole power equipment industrial chain including power generation, transmission, transformation, distribution, and consumption. The company is also operating in the fields of urban rail traffic, energy equipment manufacturing, new energy storage materials, energy Internet, investment & financing platform, and business incubator. The products have been sold to over 120 countries and regions around the world, and have entered main component markets in Europe, Asia, Middle East, and Africa.

The group ranks among top 500 private enterprises in China, and has been the largest tax payer among all manufacturers in Wenzhou for a few consecutive years. Zhejiang CHINT Electric Appliance Corporation under CHINT Group is the largest company in domestic LV electric appliance industry in terms of production and sales amount, and also the first company running LV electric appliance as main business listed in A-share market. CHINT Solar has built over a hundred photovoltaic power stations around the world, serving as the largest photovoltaic power station investor and operator in all domestic private players.

CHINT has always following the policies of innovation-driven industrial development. It's the first among all competitors to pass ISO9001 quality system certification, ISO 14001 environment system certification, and OHSAS18001 occupational health safety management certification. The group also holds China Compulsory Certificate (CCC), international CB safety certificate, US UL certificate, Finland FI certificate, Belgium CEBEC certificate, Netherland KEMA certificate, and Germany VDE certificate. The group now owns over 1000 domestic and foreign patents, and has led or participate in establishment and revision of over 120 industrial standards. Its HV and LV electric appliances and photovoltaic inverters won Germany Wed Dot Award. CHINT led development of critical manufacturing equipment PECVD, LPCVD, and MOCVD for China's first silicon based thin film photovoltaic cells, which has significantly improved semiconductor equipment manufacturing level in China.

The group has won a number of awards including China Industrial Award, National Quality Management Award, China Excellent Private Science & Technology Enterprise, China Top Ten Machinery Manufacturers with Core Competitiveness, China Top Ten Leading Private Enterprises with Independent Innovation Capabilities, China Contract-Fulfilling and Trustworthy Enterprise, National Advanced Private Enterprise for Employment and Social Security, and China Charity Award.

In the future, CHINT will march towards the targets of creating world famous brands and contributing to an industrial power. It will focus on building the Energy Internet and becoming a smart energy developer and operator. The group will make great efforts to implement three policies: globalization, M&A and integration, and smart manufacturing. Four platforms will be created, including scientific innovation and industrial incubation platform, online industrial and civil Internet of Things platform, online & offline supply chain interaction platform, and investment & financing and payment platform. Four industrial clusters will also be developed, including smart electrical system solution industrial cluster for smart grid, industrial automation information cluster for smart cities, clean energy, environment protection, and energy conservation industrial cluster for smart micro-grid, high-tech material information technology and high-end equipment industrial cluster for smart manufacturing, and Internet of Things IT and smart home industrial group for smart business.

The Next Reliable Choice

Modular Din Rail Product

Contact site indicating window, more clearly on the position

All products have the contact site indicating window, which can prevent wrong operation, and make the using more reliable.

Large current with small dimension, save the installation space

50A MCCB is only 18mm width, while 63A RCCB is only 36mm width.

More choice of specifications of the residual operating current

6 specifications including 10mA, 30mA, 50mA, 75mA, 100mA and 300mA, for a wider choice and more accurate protection.

Complete accessories, multifunctional combination

More accessories selection to achieve customer needs, reduce customization and cost.

Absolute adaptability, with steady and reliable operation in extreme conditions

-35°C/+70°C operating temperature range. Meets several applications requirements.

10mA Earth leakage protection

First prevent the danger
More reliably on safety

Modular DIN Rail Product

Identifier description

NXB-63 Miniature circuit breaker

NXBLE-63 Residual current operated circuit breaker

Product overview

● Miniature circuit breaker

Overload protection, short circuit protection and isolation. It is widely used in building power distribution, industrial power distribution, as well as control and protection for a variety of equipment with operating current not exceeding 125A. Key products series include:

NXB-40

40A and below single mode 1P + N
Miniature Circuit Breaker
(IEC/EN 60898-1)

NXB-63

63A and below Miniature
Circuit Breaker
(IEC/EN 60898-1)

NXB-63H

63A and below Miniature Circuit
Breaker (IEC/EN 60898-1)

NXB-80

80A and below 1P, 1P + N, 2P
Miniature Circuit Breaker
(IEC/EN 60898-1)

NXB-125

125A and below Molded Case
Circuit Breaker
(IEC/EN 60898-1)

NXB-125G

125A and below Miniature
Circuit Breaker
(IEC/EN 60898-1)

Modular DIN Rail Product

Product overview

● Residual current operated circuit breaker (RCBO)

It has the function of overload and short circuit protection, isolation and Earth leakage current protection, i.e., besides the protection function of Miniature Circuit Breaker, it can also serve as additional protection for direct or indirect electric leakage/shock or protective measures for electric fire. It is especially suited for places with low safety level, such as bathroom, swimming pool, plug socket or transformer.

Key products series include:

NXBLE-40
40A and below 1P + N RCBO
(IEC/EN 61009-1)

NXBLE-63Y
63A and below 1P + N RCBO
(IEC/EN 61009-1)

NXBLE-32
32A and below RCBO
(IEC/EN 61009-1)

NXBLE-63
63A and below RCBO
(IEC/EN 61009-1)

NXBLE-125
125A and below RCBO
(IEC / EN 60947-2)

NXBLE-125G
125A and below RCBO
(IEC/EN 61009-1)

Product overview

● Accessories

A variety of additional features can be achieved with wide range of accessories when used with circuit breaker, such as alerts, shunt trip, under-voltage protection, etc. Usually the Max number of accessories assembled on the circuit breaker is three. Accessories with independent tripping function should be assembled first, such as shunt trip, and under-voltage trip, Followed by other accessories, such as auxiliary contacts, alarm auxiliary contacts.

Accessories that can be assembled with NXC-63 series (IEC/EN 60947-5)

AX-X1
Auxiliary contacts

AL-X1
Alarm auxiliary contacts

SHT-X1
Shunt release

OVT-X1
Over-voltage release

UVT-X1
Under-voltage release

OUVT-X1
Over/under voltage release

Modular DIN Rail Product

Product overview

Accessories for NXC-125 series (IEC/EN 60947-5)

AX-X3
Auxiliary contacts

AL-X3
Alarm auxiliary contacts

SHT-X3
Shunt release

OVT-X3
Over-voltage release

UVT-X3
Under-voltage release

OUVT-X3
Over/under voltage release

Product overview

● Surge protector

It is mainly suitable for lightning protection for low-voltage distribution system in the building, and surge protection for the main inlet cabinet.

Key product models include (IEC61643-11):

NXU- I + II
Surge protector that meets both
Type I and Type II SPD test

NXU-II
Surge protector that meets
Type II SPD test

NXU-III
Surge protector that meets
Type III SPD test

● Isolation switch

With isolation function, it is mainly used for isolation and functional analysis of terminal power distribution.

NXHB-125
125A and below isolation switch
(IEC/EN60898-3)

Modular DIN Rail Product

Parameters

● Circuit breaker and switch parameters

Product model		NXB-40	NXB-63	NXB-63H
Compliant standards		IEC60898-1	IEC60898-1	IEC60898-1
Rated current (A)		6~40	1~63	1~63
Rated voltage (V ~)		240	240/415	240/415
Rated frequency (Hz)		50/60	50/60	50/60
Number of poles		1P+N	1P, 1P+N, 2P, 3P, 3P+N, 4P	1P, 1P+N, 2P, 3P, 3P+N, 4P
Mechanical life (cycles)		20000	20000	20000

Tripping characteristics

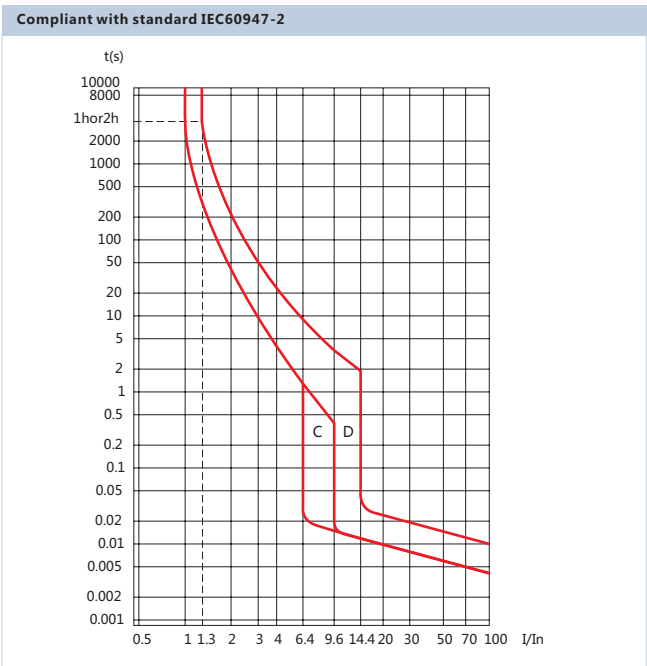

● Tripping characteristics are in compliant with standard IEC60898-1 and IEC61009-1

Test	Type	Test current	Starting state	Trip/Not trip time limit	Expected outcome	Notes
a	B,C,D	1.13In	Cold	$t \leq 1 \text{ h (for } I_n \leq 63 \text{ A)}$ $t < 2 \text{ h (for } I_n > 63 \text{ A)}$	Not trip	
b	B,C,D	1.45In	Right after test	$t < 1 \text{ h (for } I_n \leq 63 \text{ A)}$ $t < 2 \text{ h (for } I_n > 63 \text{ A)}$	Trip	Current increase steadily within 5s
c	B,C,D	2.55In	Right after test	$1 \text{ s} < t < 60 \text{ s (for } I_n \leq 32 \text{ A)}$ $1 \text{ s} < t < 120 \text{ s (for } I_n > 32 \text{ A)}$	Trip	
d	B C D	3In 5In 10In	Cold	$t \leq 0.1 \text{ s}$	Not trip	Connect the current by closing the auxiliary switch
e	B C D	5In 10In 20In	Cold	$t < 0.1 \text{ s}$	Trip	Connect the current by closing the auxiliary switch

● Tripping characteristics are in compliant with standard IEC60947-2

Release type	Test current	Starting state	Trip/Not trip time limit	Expected outcome	Notes
C, D	1.05In	Cold	<div><div>t≤1 h(for In≤63A)</div><div>t≤2 h(for In > 63A)</div></div>	Not trip	
C, D	1.3In	Right after test	<div><div>t < 1 h(for In≤63A)</div><div>t < 2 h(for In > 63A)</div></div>	Trip	Current increase steadily within 5s
C, D	2In	Cold	t < 900s	Trip	
C	6.4In	Cold	t≤0.2s	Not trip	Connect the current by closing the auxiliary switch
D	9.6In				
C	9.6In	Cold	t < 0.2s	Trip	
D	14.4In				

● Tripping curve

Cross-sectional area of the connecting copper wire

- The following table shows the cross-sectional area of the copper wire corresponding to the rated current (recommended value):

Copper wire cross-sectional area Smm ²	Rated current In(A)
1	In≤8
1.5	8 < In≤12
2.5	12 < In≤20
4	20 < In≤25
6	25 < In≤32
10	32 < In≤50
16	50 < In≤63
25	63 < In≤85
35	85 < In≤115
50	115 < In≤150

Product selection and order

- Circuit breakers

Product model	Number of poles	Electromagnetic release type	Rated current	Rated residual operating current
NXB-40	1P+N	C, D	6A, 10A, 16A, 20A, 25A, 32A, 40A	0.01A, 0.03A
NXBLE-40				
NXB-63	1P, 1P+N, 2P, 3P, 3P+N, 4P	B, C, D	1A, 2A, 3A, 4A, 6A, 10A, 16A, 20A, 25A, 32A, 40A, 50A, 63A	
NXBLE-32	1P+N, 2P, 3P, 3P+N, 4P	B, C, D	6A, 10A, 16A, 20A, 25A, 32A	0.03A, 0.05A, 0.075A, 0.1A, 0.3A
NXBLE-63			6A, 10A, 16A, 20A, 25A, 32A, 40A, 50A, 63A	
NXBLE-63Y	1P+N	C, D	6A, 10A, 16A, 20A, 25A, 32A, 40A, 50A, 63A	0.01A, 0.03A
NXB-80	1P, 1P+N, 2P	B, C, D	80A	
NXB-125	1P, 2P, 3P, 4P	C, D	63A, 80A, 100A, 125A	
NXB-125G		B, C, D		
NXBLE-125	1P+N, 2P, 3P, 3P+N, 4P	C, D		0.03A, 0.05A, 0.075A, 0.1A, 0.3A
NXBLE-125G		B, C, D		

Ordering example:NXB-40 C16 50 units

NXB-63 3P D63 50 units

NXBLE-63 1P+N C63 0.03A 30 units

- Surge protector

Product model	Remote signal contacts	Inrush current	Nominal discharge current	Open circuit voltage	Maximum continuous operating voltage	Number of poles
NXU-I+II	Default: No F: Yes	12.5kA			255V, 275V	1P, 1P+N, 2P, 3P, 3P+N, 4P
NXU-II	Default: No F: Yes		20kA, 40kA, 65kA, 100kA		255V, 275V, 320V, 385V, 440V	1P, 2P, 3P, 4P, 1P+N, 3P+N
NXU-III				10kV	255V, 275V, 320V, 385V	1P+N, 2P

Ordering example: NXU-I+II/F 12.5kA 275V 2P 300 units

NXU-II/F 40kA 320V 2P 300 units

NXU-III 10kV 320V 2P 300 units

Product description

Miniature circuit breaker

NXB-63 Miniature circuit breaker	P-15
NXB-63H Miniature circuit breaker	P-16
NXB-80 Miniature circuit breaker	P-17
NXB-40 Miniature circuit breaker	P-18
NXB-125 Moulded case circuit breaker	P-19
NXB-125G Miniature circuit breaker	P-20

Residual current operated circuit breaker (RCBO)

NXBLE-32 Residual current operated circuit breaker (RCBO)	P-21
NXBLE-63 Residual current operated circuit breaker (RCBO)	P-22

NXBLE-40 Residual current operated circuit breaker (RCBO)	P-24
NXBLE-125 Residual current operated circuit breaker (RCBO)	P-25
NXBLE-125G Residual current operated circuit breaker (RCBO)	P-26

Accessories

AX-X1 Auxiliary contact	P-27
AL-X1 Alarm auxiliary contact	P-28
SHT-X1 Shunt release	P-29
OVT-X1 Overvoltage release	P-31
UVT-X1 Under-voltage release	P-32
OUVT-X1 Over/under voltage release	P-33
AX-X3 Auxiliary contact	P-34
AL-X3 Alarm auxiliary contact	P-36
SHT-X3 Shunt release	P-38
OVT-X3 Overvoltage release	P-40
UVT-X3 Under-voltage release	P-41
OUVT-X3 Over/under voltage release	P-42

Surge protector

NXU- I + II Surge protector	P-43
NXU- II series surge protector	P-45
NXU- III series surge protector	P-48

Isolation switch

NXHB-125 Isolation switch	P-50
---------------------------	------

NXB-63 Miniature circuit breaker

NXB-63 Miniature circuit breaker

Compliant standards

IEC60898-1

Compliant certification

CE

Major function

Overload protection, short circuit protection, positive isolation

Technical parameters

Rated current: 1A, 2A, 3A, 4A, 6A, 10A, 16A, 20A, 25A, 32A, 40A, 50A, 63A;
Rated voltage: 240V ~ (1P, 1P+N), 415V ~ (2 ~ 4P, 3P+N);
Frequency: 50/60Hz;
Electromagnetic release type: B, C, D;
Number of poles: 1P, 1P+N, 2P, 3P, 3P+N, 4P;
Mechanical life: 20000 cycles;
Electrical life: 10000 cycles;
Rated short-circuit breaking capacity(Icu): 6000A;
Short-circuit breaking capacity (Ics): 6000A;
Rated impulse withstand voltage (Uimp): 4kV;
Power consumption on each pole of the circuit breaker: see Table 1.

Table 1

Rated current In (A)	Maximum power consumption per pole (W)
1~10	2
16~32	3.5

AX-X1 Auxiliary contact

AX-X1 Auxiliary contact

Compliant standards

IEC60947-5-1

Compliant certification

CE

Major function

To achieve long-distance signal indication for the open/close status of the circuit breaker

Parameters and performance

Table 1

Utilization category	Rated operating voltage V	Rated operating current A
AC-12	AC 415	3
	AC 240	6
	DC 130	1
DC-12	DC 48	2
	DC 24	6

Action characteristics: Figure 1 shows the wiring diagram for auxiliary contacts.
When the auxiliary contacts is open, terminals 11 and 12 are connected;
When the auxiliary contacts is closed, terminals 11 and 14 are connected.
Life: Operating life of auxiliary contacts is ≥ 10000 cycles.

Assembly and installation of the product

Can be assembled with NXB-63, NXB-40 series circuit breakers, with assembly diagram shown below:

After AX-X1 is assembled with the circuit breaker, mount them on the TH3.5-7.5 steel mounting rail.

Dimensions and installation sizes

AL-X1 Alarm auxiliary contact

AL-X1 Alarm auxiliary contact

Compliant standards

IEC60947-5-1

Compliant certification

CE

Major function

To achieve signal indication over long distance for open/close status of the circuit breaker and alarm.

Parameters and performance

Table 1

Utilization category	Rated operating voltage V	Rated operating current A
AC-12	AC 415	3
	AC 240	6
	DC 130	1
DC-12	DC 48	2
	DC 24	6

Action characteristics: Figure 1 shows the wiring diagram for auxiliary contact. When the auxiliary contact is open, terminals 91 and 94 are connected; When the auxiliary contact is closed, terminals 91 and 92 are connected. When the alarm auxiliary contact is closed, and manually opened with the handle, terminals 91 and 92 shall still be connected; when the alarm auxiliary contact is closed, and the assembled circuit trip is open due to error, terminals 91 and 92 shall be open, and terminals 91 and 94 shall be connected; Life: Operating life of alarm auxiliary contact is ≥ 10000 cycles.

Figure 1

Assembly and installation of the product

Can be assembled with NXB-63, NXB-40 series circuit breakers, with assembly diagram shown below:

Figure 2

After AL-X1 is assembled with the circuit breaker, mount them on the TH3.5-7.5 steel mounting rail.

Dimension and installation sizes

Figure 3

SHT-X1 Shunt release

SHT-X1 Shunt release

Major function

To be assembled with the circuit breaker to achieve remote shunt trip.

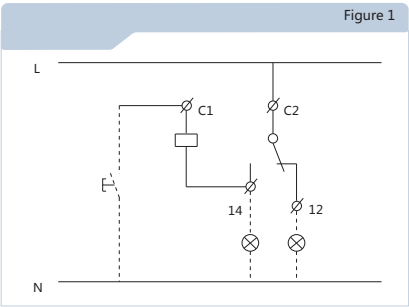

Parameters and performance

Rated insulation voltage (Ui): 500V;
Rated operation current under different
rated operation voltage (see Table 1):
Utilization category: AC-12, DC-12.

Table 1

Rated operating voltage (V)	Rated operating current (A)
AC 415	3
AC 240	6
AC/DC 48	3
AC/DC 24	6

Action characteristics: within the range of 70% ~ 110% of the rated control supply voltage, the release should operate reliably to open the circuit breaker. Figure 1 shows the wiring diagram for the release. When the release is open, terminal C2 and 12 shall be connected, and the external security indicator shall light up; when the release is closed, terminal C2 and 14 shall be connected, and the external warning indicator shall light up; when the release is closed, and the external button is connected, the release shall trip and drive the circuit breaker to trip and be opened. Meanwhile, the release indicator shall display trip mark. Mechanical life: operating life of the release is ≥ 4000 cycles.

Assembly and installation of the product

SHT-X1 can be assembled with NXB-63 or NXB-40 series circuit breaker, with the assembly diagram shown below:

After SHT-X1 is assembled with the circuit breaker, mount them on TH35-7.5 steel mounting rail.

Dimensions and installation sizes

Figure 3

OVT-X1 Overvoltage release

OVT-X1 Overvoltage release

Major function

To be assembled with the circuit breaker to achieve overvoltage protection.

Parameters and performance

Rated operation voltage U_e : AC 240V 50Hz (or 60Hz).

Rated insulation voltage U_i : 500V.

Overvoltage setting value U_{vo} : 280V.

Release action characteristics: when the main circuit voltage is in the range of (85% ~ 110%) U_e , the release shall be able to keep the circuit breaker to work reliably for long term. When the main circuit voltage is increased to 280 (1 ± 5%) V, the release assembled with NXB-63 series circuit breaker should act and trip open NXB-63 circuit breaker.

Mechanical and electrical life: the mechanical and electrical life of release is ≥ 4000 operation cycles.

Assembly and installation of the product

OVT-X1 can be assembled with NXB-63 or NXB-40 series circuit breaker, with the assembly diagram shown below:

After the release is assembled with the circuit breaker, mount them on TH35-7.5 steel mounting rail.

Dimensions and installation sizes

UVT-X1 Under-voltage release

UVT-X1 Under-voltage release

Major function

To be assembled with the circuit breaker to achieve overvoltage protection.

Parameters and performance

Rated operation voltage U_e : AC 240V

Rated insulation voltage U_i 500V

Action characteristics: when the applied voltage $\leq 35\% U_e$, the product should prevent circuit breaker from closing; when $35\% U_e \leq$ applied voltage $\leq 70\% U_e$, the product should operate and drive the circuit breaker open; when the applied voltage $\geq 85\% U_e$, the product should be able to close. The applied voltage should not exceed $110\% U_e$.

Life: the operating life of the release is ≥ 4000 cycles.

Assembly and installation of the product

UVT-X1 can be assembled with NXB-63 or NXB-40 series circuit breaker, with the assembly diagram shown below:

Figure 1

After the release is assembled with the circuit breaker, mount them on TH35-7.5 steel mounting rail.

Dimensions and installation sizes

Figure 2

OUVT-X1 Over/under voltage release

OUVT-X1 Over/under voltage release

Major function

To be assembled with circuit breaker to achieve over/under voltage protection

Parameters and performance

Rated operation voltage U_e : AC 240V, 50Hz;

Overvoltage operation setting value U_{vo} : 280V;

Rated insulation voltage U_i : 500V;

Tripping characteristics: the release is assembled with NXB-63 series circuit breaker. When the applied voltage is reduced to 35% U_e or increased to 95% ~ 105% of the over-voltage setting value, the release should drive the circuit breaker to act. When the applied voltage is below 35% U_e or above 105% of the over-voltage setting value, the release should be able to prevent the circuit breaker from closing. When the supply voltage is above 85% U_e and below 95% of over-voltage setting value, the circuit breaker should be able to close normally. The upper limit of the applied voltage should be less than 110% over-voltage operation setting value.

Mechanical and electrical life: the mechanical and electrical life after the release is assembled with the circuit breaker should be ≥ 4000 cycles, of which, 500 cycles for over-voltage trip and under-voltage trip each, and 3000 cycles for the open/close of the circuit breaker.

Assembly and installation of the product

OUVT-X1 can be assembled with NXB-63 or NXB-40 series circuit breaker, with the assembly diagram shown below:

Figure 1

After AL-X1 is assembled with the circuit breaker, mount them on the TH3.5-7.5 steel mounting rail.

Dimensions and installation sizes

Figure 2

AX-X3 Auxiliary contact

Major function

IEC60947-5-1

Compliant certification

CE

Major function

To be assembled with the circuit breaker to achieve long-distance signal indication for the open/close status of the circuit breaker

Parameters and performance

Rated operating currents under different working voltages: Table 1

Utilization category	Rated operating voltage V	Rated operating current A
AC-12	AC 415	3
	AC 240	6
	DC 130	1
DC-12	DC 48	2
	DC 24	6

Action characteristics: Figure 1 shows the wiring diagram for auxiliary contacts. When the auxiliary contacts is open, terminals 11 and 12 is connected; When the auxiliary contacts is closed, terminals 11 and 14 is connected.

Life: Operating life of auxiliary contacts is ≥ 10000 cycles.

Assembly and installation of the product

AX-X3 can be assembled with NXB-125, NXB-125G series circuit breaker, with the assembly diagram shown below:

After AX-X3 is assembled with the circuit breaker, mount them on the TH3.5-7.5 steel mounting rail.

AX-X3 Auxiliary contact

Dimensions and installation sizes

Figure 4

AL-X3 Alarm auxiliary contact

Compliant standards

IEC60947-5-1

Compliant certification

CE

Major function

To be assembled with the circuit breaker to achieve signal indication over long distance for open/close status of the circuit breaker and alarm.

Parameters and performance

Rated operation currents under different working voltages:

Table 1		
Utilization category	Rated operating voltage V	Rated operating current A
AC-12	AC 415	3
	AC 240	6
DC-12	DC 130	1
	DC 48	2
	DC 24	6

Action characteristics: Figure 1 shows the wiring diagram for auxiliary contact.

When the auxiliary contact is open, terminals 91 and 94 is connected; When the auxiliary contact is closed, terminals 91 and 92 is connected. When the alarm auxiliary contact is closed, and manually open with the handle, terminals 91 and 92 shall still be connected; when the alarm auxiliary contact is closed, and the assembled circuit trip open due to error, terminals 91 and 92 shall be open, and terminals 91 and 94 shall be connected;

Life: Operating life of alarm auxiliary contact is ≥ 10000 cycles.

Assembly and installation of the product

AL-X3 can be assembled with NXB-125 series circuit breaker, with the assembly diagram shown below:

After AL-X3 is assembled with the circuit breaker, mount them on the TH3.5-7.5 steel mounting rail.

AL-X3 Alarm auxiliary contact

Dimensions and installation sizes

Figure 2

SHT-X3 Shunt release

Major function

To be assembled with the circuit breaker to achieve remote shunt trip.

Parameters and performance

Table 1

Rated insulation voltage (Ui): 500V;
Rated operation current under different
rated operation voltage (see Table 1):
Utilization category: AC-12, DC-12.

Rated operating voltage (V)	Rated operating current (A)
AC 415	3
AC 240	6
AC/DC 48	3
AC/DC 24	6

Action characteristics: within the range of 70% ~ 110% of the rated control supply voltage, the release should operate reliably to open the circuit breaker. Figure 1 shows the wiring diagram for the release. When the release is open, terminal C2 and 12 shall be connected, and the external security indicator shall light up; when the release is closed, terminal C2 and 14 shall be connected, and the external warning indicator shall light up; when the release is closed, and the external button is connected, the release shall trip and drive the circuit breaker to trip and be opened. Meanwhile, the release indicator shall display trip mark. Mechanical life: operating life of the release is ≥ 4000 cycles.

Assembly and installation of the product

SHT-X3 can be assembled with NXB-125 circuit breaker, with the assembly diagram shown below:

After the release is assembled with the circuit breaker, mount them on TH35-7.5 steel mounting rail.

SHT-X3 Shunt release

Dimensions and installation sizes

Figure 3

OVT-X3 Overvoltage release

Major function

To be assembled with the circuit breaker to achieve overvoltage protection.

Parameters and performance

Rated operation voltage U_e : AC 240V 50Hz (or 60Hz).

Rated insulation voltage U_i : 500V.

Overvoltage setting value U_{vo} : 280V.

Release action characteristics: when the main circuit voltage is in the range of (85% ~ 110%) U_e , the release shall be able to keep the circuit breaker to work reliably for long term.

When the main circuit voltage is increased to 280 (1 ± 5%) V, the release assembled with NXB-125series circuit breaker should act and trip open NXB-125 circuit breaker.

Mechanical and electrical life: the mechanical and electrical life of release is ≥ 4000 operation cycles.

Assembly and installation of the product

OVT-X3 can be assembled with NXB-125 series circuit breaker, with the assembly diagram shown below:

After the release is assembled with the circuit breaker, mount them on TH35-7.5 steel mounting rail.

Dimensions and installation sizes

UVT-X3 Under-voltage release

UVT-X3 Under-voltage release

Major function

To be assembled with the circuit breaker to achieve under-voltage protection

Parameters and performance

Rated operation voltage U_e : AC240V

Rated insulation voltage U_i 500V

Life: the operating life of the release is ≥ 4000 cycles.

Action characteristics: when the applied voltage $\leq 35\% U_e$, the product should prevent circuit breaker from closing; when $35\% U_e \leq \text{applied voltage} \leq 70\% U_e$, the product should operate and drive the circuit breaker open; when the applied voltage $\leq 85\% U_e$, the product should be able to close. The applied voltage should not exceed $110\% U_e$.

Assembly and installation of the product

UVT-X3 can be assembled with NXB-125 series circuit breaker, with the assembly diagram shown below:

After the release is assembled with the circuit breaker, mount them on TH35-7.5 steel mounting rail.

Dimensions and installation sizes

OUVT-X3 Over/under voltage release

OUVT-X3 Over/under voltage release

Major function

To be assembled with circuit breaker to achieve over/under voltage protection

Parameters and performance

Rated operation voltage U_e : AC240V, 50Hz;

Overvoltage operation setting value U_{vo} : 280V;

Rated insulation voltage U_i : 500V;

Tripping characteristics: the release is assembled with NXB-125 series circuit breaker. When the applied voltage is reduced to 35% U_e or increased to 95% ~ 105% of the over-voltage setting value, the release should drive the circuit breaker to act. When the applied voltage is below 35% U_e or above 105% of the over-voltage setting value, the release should be able to prevent the circuit breaker from closing. When the supply voltage is above 85% U_e and below 95% of over-voltage setting value, the circuit breaker should be able to close normally. The upper limit of the applied voltage should be less than 110% over-voltage operation setting value.

Mechanical and electrical life: the mechanical and electrical life after the release is assembled with the circuit breaker should be ≥ 4000 cycles, of which, 500 cycles for over-voltage trip and under-voltage trip each, and 3000 cycles for the open/close of the circuit breaker.

Assembly and installation of the product

NXU-II series surge protector

Special feature:

- NXU- II surge protector consists of two major components, the protection module (4) and base (2), their structures are completely independent of each other, and can be plugged/unplugged as shown in Figure 1.
 - NXU- II surge protector is configured with a degradation indicator (3), as shown in the figure. After the product gets degraded, it shall pop up on the surface of protection module (4) for warning. The protection module (4) should be immediately replaced, and there is no need to disconnect the line or rewire.
- (1) in the figure is the maximum continuous operation voltage indication of the surge protector, it can also be used to prevent modules of erroneous dimensions get inserted when changing the module. The value pointed by the heart-shaped angular pointer is the maximum continuous operation voltage of the product.

Compliant certification

CE

Major function

Isolation function

Parameters and performance

Rated current I_e : 20A, 32A, 40A, 63A, 80A, 100A, 125A;
Number of poles: 1P, 2P, 3P, 4P;
Rated insulation voltage U_i : 500V;
Rated operation voltage U_e : 240V~(1P), 415V~(2P, 3P, 4P);
Rated impulse withstand voltage U_{imp} : 6kV;
Rated short time withstand current I_{cw} : 12 I_e , power-on time of 1s;
Rated short-circuit making capacity I_{cm} : 20 I_e , power-on time of 0.1s;
Rated making and breaking capacity: 3 I_e , 1.05 U_e , $\cos\phi=0.65$;
Operation performance: mechanical life of 10,000 cycles, electrical life of 3000 cycles;
Pollution degree: II;
Utilization category: AC-22A, AC-21B;
Installation category: II, III;
Installation: TH35-7.5 steel rail mounting, the gradient of the mounting surface from the vertical plane should be $\leq 5^\circ$;
Wiring: screw clamp wiring, tightening torque 3.5N·m (80A ~ 125A);
tightening torque 2.0N·m(20A ~ 63A).
